

SIGN4L

W i f i n d e r

ACTIVE,
MITM, LONG
RANGE, WIFI
INTERCEPTION
SYSTEM

SIGN4L has developed a powerful cellular interception technology capable of detecting and intercepting any Wi-Fi enabled device. Designed for covert operations, the versatile system can be mounted onto a modest vehicle or encased in a small briefcase.

Product:

Wifinder is a tactical solution for obtaining valuable data intelligence from Wi-Fi networks using 2.4 and 5GHz frequency band. Featuring an active beam-steering antenna and strong sensors, Wifinder boasts a significant capture range and collects large amounts of Wi-Fi emitters and metadata in real time.

Features:

- Scanning for Wi-Fi stations and access points
- Versatile and adaptive for all operational requirements
- Includes local and remote Command and Control (C&C) interfaces
- Active beam-steering antenna

Feature	Specification
Simultaneous monitoring of Wi-Fi networks	As many as the sensor can detect
Frequency Band	2.4GHz, 5GHz
Wi-Fi protocol	802.11a/b/g/n/ac
Wi-Fi security protocols	WEP/WPA/WPA2
Jamming of Wi-Fi network	No
MITM	Yes
