

# AL TARIQ

## LONG RANGE, MODULAR SOLUTION FOR THE DYNAMIC BATTLEFIELD

Modular family of Precision Guided kits for the 120/250/450 kg series of aerial bombs. Designed to fulfil operational needs for high accuracy, long stand-off range engagements against stationary, moving and re-locatable targets in a GPS denied environment.

Al Tariq is an advanced tactical solution with all-weather, day or night operational capability.

The system enables enhanced targeting accuracy by utilising Dual mode Seekers;

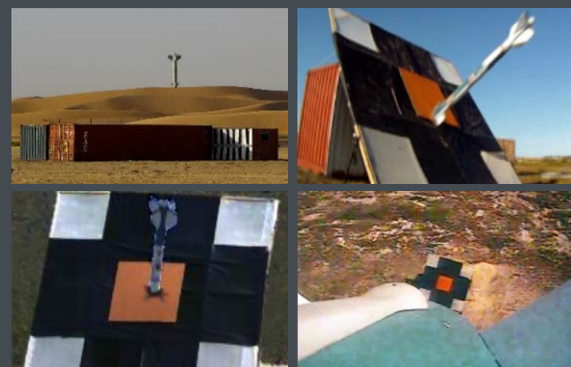

- Imaging Infrared (IIR) with Automatic Target Recognition (ATR),
- Laser (SAL) seeker,
- GNSS

### ADVANTAGES

- Reliable and affordable
- Long stand-off range
- Fire-and-Forget
- Wireless aircraft integration
- Target versatility -pre-planned and Targets of Opportunity
- Variable attack heading
- Variable attack angle (up to 90°)

# POWERED BY PRECISION

## MAIN FEATURES

- Superior modularity – one kit fits 250 kg - 450 kg
- All weather, day and night
- LOBL and LOAL capability
- Insensitive to GPS jamming
- Re-targeting capability
- Simple Mission Planning
- Battery option for stand-alone integration
- Simple operation, flexible deployment
- Low life cycle cost

## TECHNICAL SPECIFICATIONS

Stand-off range: exceeds 120 km

Warheads: Mk 81/82/83

High accuracy: < 2m (IIR)

Moving target engagement

Targets of Opportunity

Mechanical and electronic fuze integration

Pre-set or cockpit selectable fuze options

Height of Burst (HOBs) integrated

Penetration solution

## MODULARITY

A range of interchangeable Dual mode Seekers (including Height-of-Burst Sensor) provide superior mission flexibility

### AL TARIQ S – STANDARD RANGE

Stand-off range 30 – 45 km

Warhead 250 kg – 450 kg

Guidance GNSS/IMU with IIR (ATR), SAL, GNSS

### AL TARIQ LR – LONG RANGE

Stand-off range 90 – 120+ km

Warhead 250 kg – 450 kg

Guidance GNSS/IMU with IIR (ATR), SAL, GNSS

Wings installed

## THE AL TARIQ FAMILY IS MISSION PROVEN AND IN OPERATIONAL USE

### PLATFORM INTEGRATION

Wireless integration solution is operational and mission proven on several types of fighter aircraft. Digital integration and stand-alone options available.
