

PHANTOMHAWK

TACTICAL HYBRID VTOL SYSTEM LONG ENDURANCE EXCEPTIONAL ISR CAPABILITIES

Designed from bottom up The PhantomHawk is an high preformance tactical system designed for continuous, long-endurance missions, ensuring unmatched ease of deployment and seamless logistical with a vertical takeoff and landing (VTOL) capabilities. Tailored to meet today's high demands of Defense and Homeland Security operations, the PhantomHawk offers superior ISR operational capabilities.

With Its impressive endurance, advanced AI-powered ISR systems, and operational versatility, the pahntomHawk is a unique Group 2 UAS system, delivering advance performance, reliable and scalable solution.

SPECIFICATIONS

KEY FEATURES

- E
- Long Endurance VTOL ISR system
 - Seamless logistical footprint
 - Advanced ISR & C2 application

SPECIFICATIONS

Maximum take-off weight	32 kg
Endurance	12 hrs with 3.5 kg payload
Range	Up to 150 km (can be extended)
Maximum Payload weight	7 kg
Engine type	Hybrid eVTOL + IC
Operating Temperature	-20°C to 50°C
Typical Operating Altitude	5,000 ft
ceiling Altitude	12,000 ft
Wingspan	4.0m
